Mentor Meeting 1 Agenda

Topics for discussion:

- **UI question**: should we have 2 separate text inputs, each for a different language?
- **Globalization**: because our application is geared towards different language speakers, should we create versions of our application that are in different languages?
- **Security**: In web development, which types of questions is it acceptable to ask a user to answer and which are not?
- **Work Division:** In what ways can we best divide up the work of the project such that there is a minimum amount of dependence amongst each other's works? This is to reduce bottlenecks in the development process.
- **Design Document:** Can we just make the design document's format similar to the problem analysis document from project 3?
- **Design Document:** Clarify the assignment and confirm exactly what we need to accomplish for the design document.
- **Non-responsive users:** Whats the best way to pair two users?
- **"Stake-holders":** What do you mean by stake-holders?
- **Multiple chats at once?**
