Mentor Meeting 1 Progress Report

- We used our first days together to sort out the logistics of our group. In particular this includes:
  - Setting up a group chat
  - Determining a protocol for setting up weekly meetings

- We used the first days to select a project that we are all interested in
- We've also started developing more concrete ideas for the implementation of our project
- In preparation for the presentation we've naturally started answering some of the questions posed in the next set of deliverables, especially motivation and concepts
- We've finished our team plan and an overview of our app, you can find them in the repo
- We've also divided up the work for the next deliverable among ourselves
  - Guillermo - Chat, Motivation, Context Diagram
  - Faruk - Chat, Data model
  - Jonathan - Matching Algorithm, Security Concerns, User Interface
  - Eben - Data Model, Concepts
